Installation and Operation Manual
Part Number CD/CIM253L2L3.OM
Rev.1

Errata A

Comtech EF Data Documentation Update

Subject: Revise Paragraph 2.3.1 Powering the CiM-25

Date: July 9, 2004

Part Number: CD/CIM25300L2L3.OM

Related Document: CiM-25/300L2L3,for SDM-300L2/SDM-300L3,IPEnabled,M&C,Installation and Operation Manual,Part Number CD/CIM253L2L3.OM,Rev.1

Collating Instructions: Attach to Page 4

Comments:

This information will be incorporated into the next revision.

Change Specifics:

2.3.1 Powering the CiM-25

An AC/DC adapter is supplied to provide the CiM-26F power via the power-jack connector. There is no ON/OFF switch for the CiM-25.

CIM-25/300L2L3

for SDM-300L2/SDM-300L3

Comtech EF Data is an ISO 9001
Registered Company.

CUSTOMER SUPPORT

Contact the Comtech EF Data Customer Support Department for:

- ▶ Product support or training
- ▶ Information on upgrading or returning a product
- ▶ Reporting comments or suggestions concerning manuals

A Customer Support representative may be reached at:

Comtech EF Data
Attention: Customer Support Department
2114 West 7th Street
Tempe, Arizona 85281 USA

480.333.2200 (Main Comtech EF Data Number)
480.333.4357 (Customer Support Desk)
480.333.2161 FAX

or, E-Mail can be sent to the Customer Support Department at:

cimfss@comtechefdata.com

Contact us via the web at www.comtechefdata.com.

1. To return a Comtech EF Data product (in-warranty and out-of-warranty) for repair or replacement:
2. Request a Return Material Authorization (RMA) number from the Comtech EF Data Customer Support Department.
3. Be prepared to supply the Customer Support representative with the model number, serial number, and a description of the problem.
4. To ensure that the product is not damaged during shipping, pack the product in its original shipping carton/packaging.
5. Ship the product back to Comtech EF Data. (Shipping charges should be prepaid.)

For more information regarding the warranty policies, see Warranty Policy, p. xiii.

ABOUT THIS MANUAL

This manual provides installation and operation information for the Comtech EF Data CiM-25/300L2/3 IP Enabled M&C. This is a technical document intended for earth station engineers, technicians, and operators responsible for the operation and maintenance of the CiM-25/300L2/3 IP Enabled M&C.

CONVENTIONS AND REFERENCES

CAUTIONS AND WARNINGS

Indicates information critical for proper equipment function.

Indicates a hazardous situation that, if not avoided, may result in minor or moderate injury. CAUTION may also be used to indicate other unsafe practices or risks of property damage.

Indicates a potentially hazardous situation that, if not avoided, could result in death or serious injury.

METRIC CONVERSION

Metric conversion information is located on the inside back cover of this manual. This information is provided to assist the operator in cross-referencing English to Metric conversions.

TRADEMARKS

All product names mentioned in this manual may be trademarks or registered trademarks of their respective companies and are hereby acknowledged.

REPORTING COMMENTS OR SUGGESTIONS CONCERNING THIS MANUAL

Comments and suggestions regarding the content and design of this manual will be appreciated. To submit comments, please contact the Comtech EF Data Customer Support Department.

EMC COMPLIANCE

This is a Class A product. In a domestic environment, it may cause radio interference that requires the user to take adequate protection measures.

EN55022 COMPLIANCE

This equipment meets the radio disturbance characteristic specifications for information technology equipment as defined in EN55022.

EN50082-1 COMPLIANCE

This equipment meets the electromagnetic compatibility/generic immunity standard as defined in EN50082-1.

FEDERAL COMMUNICATIONS COMMISSION (FCC)

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instruction manual, it may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference; in which case, users are required to correct the interference at their own expense.

Note: To ensure compliance, properly shielded cables for DATA I/O shall be used. More specifically, these cables shall be shielded from end to end, ensuring a continuous shield.

SAFETY COMPLIANCE

EN 60950

Applicable testing is routinely performed as a condition of manufacturing on all units to ensure compliance with safety requirements of EN60950.

This equipment meets the Safety of Information Technology Equipment specification as defined in EN60950.

LOW VOLTAGE DIRECTIVE (LVD)

The following information is applicable for the European Low Voltage Directive (EN60950):

<HAR>	Type of power cord required for use in the European Community.
	CAUTION: Double-pole/Neutral Fusing. ACHTUNG: Zweipolare bzw. Neutralleiter-Sicherung.

International Symbols:

Symbol	Definition
	Alternating Current.
	Fuse.

Symbol	Definition
	Protective Earth.
	Chassis Ground.

Note: For additional symbols, refer to "Cautions" listed earlier in this preface.

WARRANTY POLICY

This Comtech EF Data product is warranted against defects in material and workmanship for a period of two years from the date of shipment. During the warranty period, Comtech EF Data will, at its option, repair or replace products that prove to be defective.

For equipment under warranty, the customer is responsible for freight to Comtech EF Data and all related custom, taxes, tariffs, insurance, etc. Comtech EF Data is responsible for the freight charges **only** for return of the equipment from the factory to the customer. Comtech EF Data will return the equipment by the same method (i.e., Air, Express, Surface) as the equipment was sent to Comtech EF Data.

LIMITATIONS OF WARRANTY

The foregoing warranty shall not apply to defects resulting from improper installation or maintenance, abuse, unauthorized modification, or operation outside of environmental specifications for the product, or, for damages that occur due to improper repackaging of equipment for return to Comtech EF Data.

No other warranty is expressed or implied. Comtech EF Data specifically disclaims the implied warranties of merchantability and fitness for particular purpose.

EXCLUSIVE REMEDIES

The remedies provided herein are the buyer's sole and exclusive remedies. Comtech EF Data shall not be liable for any direct, indirect, special, incidental, or consequential damages, whether based on contract, tort, or any other legal theory.

DISCLAIMER

Comtech EF Data has reviewed this manual thoroughly in order that it will be an easy-to-use guide to your equipment. All statements, technical information, and recommendations in this manual and in any guides or related documents are believed reliable, but the accuracy and completeness thereof are not guaranteed or warranted, and they are not intended to be, nor should they be understood to be, representations or warranties concerning the products described. Further, Comtech EF Data reserves the right to make changes in the specifications of the products described in this manual at any time without notice and without obligation to notify any person of such changes.

If you have any questions regarding the equipment or the information in this manual, please contact the Comtech EF Data Customer Support Department.

NOTES

Chapter 1. INTRODUCTION

CiM-25
IP-Enabled
M&C Interface

1.1 INTRODUCTION

The CiM-25 is a low-cost solution for providing an Internet Protocol (IP) Monitor and Control (M&C) interface for existing Comtech EF Data satellite modems, RF frequency converters and solid-state power amplifiers. The CiM-25 provides a custom proxy interface between the IP world and the equipment's existing serial remote control interface.

The CiM-25 provides powerful equipment management tools via the uses of HTTP protocol, SNMP v2c Protocol, and Telnet Protocol. Wrapped around these industry standard protocols is a system of account access and IP security control features to safeguard equipment from unwanted intrusions. The CiM-25 brings customer support to a new level by providing SMTP Protocol to facilitate automated, direct E-mail to Comtech EF Data's Customer Support Center.

The CiM-25 is packaged in a very compact 4.3" x 1.7" x 0.8". The unit can be powered directly by the attached equipment or via an external AC/DC adapter. The CiM-25 requires less than 1 of watt power.

The CiM-25 uses flash technology providing support for a wide variety of products from a single hardware platform. The CiM-25 either currently or will in the near future support the following Comtech EF Data equipment:

► Modems

SDM-300L1*	SDM-300A/SLM-3650*
SDM-300L2*	CDM-550T
SDM-300L3	CDM-600*
SDM-2020M*	SDM-2020D*
SDM-8000*	SDM-9000*

► Frequency Converter

UT4500 series 1 kHz and 125 kHz step size Up Converters*
DT4500 series 1 kHz and 125 kHz step size Down Converters*

*Requires an external 5 Vdc Power Supply (universal AC input). See section 2.3.1, Powering the CiM-25.

1.2 SPECIFICATIONS

SYSTEM SPECIFICATIONS	
Ethernet Interface	10base T (RJ-45)
Equipment Interface	DB9 Female on CiM-25F
	DB9 Male on CiM-25M
ENVIRONMENTAL AND PHYSICAL	
Temperature	Operating: 0 to 50° C Storage: -25 to 70° C
Power Supply	4.75 to 5.25 Vdc
Power Consumption	0.9 W typical, 1.5 W maximum
Physical Dimensions	L=110, W=43, H=20 (mm) L=4.3, W=1.7, H=0.8 (inches)
Weight	< 1 lbs
CE Approvals	EN55022 Class B (Emissions) EN50082-1 Part 1 (Immunity) EN60950 (Safety)
FCC Approval	FCC Part 15 Class B

Chapter 2. INSTALLATION

Unpacking and Inspection	3
Configuration.....	3
Connecting CiM-25 To Equipment	4

2.1 UNPACKING AND INSPECTION

Inspect shipping containers for damage. If shipping containers are damaged, keep them until the contents of the shipment have been carefully inspected and checked for normal operation.

Remove the packing list from the outside of the shipping carton. Open the carton and remove the contents, checking the contents against the packing list. Verify completeness of the shipment and that the unit functions correctly. If damage is evident, contact the carrier and Comtech EF Data immediately and submit a damage report. Keep all shipping materials for the carrier's inspection.

If the unit needs to be returned to Comtech EF Data, please use the original shipping container.

2.2 CONFIGURATION

There are no internal jumpers to configure, no interface cards to install, and no other options to install. All configuration is carried out entirely in software. The unit should first be configured locally, using the RJ-45 Ethernet interface. The unit will ship with a default IP address of 10.6.30.1, Gateway 0.0.0.0, and Mask 255.255.0.0. The default Administrator Name and Password are **admin** and **1234** respectively. See the operations section for details regarding configuring and administrating the CiM-25.

2.3 CONNECTING CiM-25 TO EQUIPMENT

The CiM-25 is designed to connect directly (no cabling) to supported Comtech EF Data Modems, Frequency Converters, or Solid State Power Amplifiers using the equipment's 9-pin remote control interface port. The CiM-25 interfaces to this equipment via a RS-232 interface at a baud rate of 19200 bps and a data format of 8-N-1. Therefore, it is necessary to first select the RS-232 interface type on the interfacing equipment prior to connecting the CiM-25 to said equipment. Some equipment automatically selects a unit address of **0** when RS232 is chosen while other equipment require the user to configure the unit remote control address to **1**. In addition, on equipment that supports multiple data formats the user must select **8-N-1** format.

2.3.1 POWERING THE CiM-25

The CiM-25F can accept power either on pin 4 of the DB9 interface to the equipment or via the power jack located next to the RJ-45 connector. An optional AC/DC adapter can be purchased to provide the CiM-25F power via the power-jack connector.

The CiM-25M accepts power via the power jack located next to the RJ-45 connector. An AC/DC adapter must be purchased to provide power to the CiM-25M.

All CDM-550 and CDM-600 modems shipped from the factory after June 1, 2001 have been modified to supply the 5 Vdc signal on pin 4. All units shipped from the factory prior to this date DO NOT provide the 5 Vdc on pin 4. A field modification kit is available and can be purchased for CDM-550 and CDM-600 modems shipped prior to this date

There is no ON/OFF switch for the CiM-25.

2.3.2 CiM-25 CONNECTORS

There are three connectors located on each CiM-25. Each is defined below:

- ▶ RJ-45 - 10base T Ethernet interface.
- ▶ DB9 – RS-232 equipment interface (either male or female)
- ▶ 1.3mm – DC Power Jack

The pinout details for these connectors are provided below.

RJ-45 Pin Out

Pin	Function
1	Tx+
2	Tx-
3	Rx+
4	No Connection
5	No Connection
6	Rx-
7	No Connection
8	No Connection

DB(Female) (CiM-25F)

Pin	Function
1	Ground
2	CiM-25 Rx
3	CiM-25 Tx
4	+5 Vdc Input
5	Ground
6	No Connection
7	No Connection
8	No Connection
9	No Connection

DB9 Male (CiM-25M)

Pin	Function
1	Ground
2	CiM-25 Rx
3	CiM-25 Tx
4	No Connection
5	Ground
6	+5 Vdc Input
7	No Connection
8	No Connection
9	No Connection

1.3mm – DC Power Jack

Pin	Function
Center Conductor	+5 Vdc Input
Outer Conductor	Ground

NOTES

Chapter 3. OPERATION

Operation Overview.....	7
Administration and Security.....	7
HTTP Interface	10
SNMP Interface	29
Telnet Interface.....	31
Maintenance Interface.....	39

3.1 OPERATION OVERVIEW

Each CiM-25 unit is programmed in the factory to provide a custom proxy interface to one of Comtech EF Data's previously defined equipments. This means that a CiM-25 that is loaded to interface a SDM-300L2/SDM-300L3 Modem to the IP world will not operate with any other piece of Comtech EF Data equipment, unless the personality is changed via a flash upload. However every CiM-25, independent of personality, shares a large number of common features. For instance, all CiM-25 units provide the same degree of security features, network protocols, and administration features. The following sections will provide a detailed description of all the features available for a specific CiM-25 (i.e. CiM-25/300L2/3 with SDM-300L2/SDM-300L3 Modem). Those areas that are common to all CiM-25 units will be expounded upon and delineated. The areas that are specific to the individual personality (i.e. equipment parameter control) will only be briefly covered since these are already covered in detail in the individual equipment operator manuals.

3.2 ADMINISTRATION AND SECURITY

The CiM-25 has been designed to provide a high degree of administrative flexibility to insure that each customer can configure the device (or network of devices) in a manner that meets his/her security needs. The primary tools provided are the Host Allow List, PING enable/disable, and three (3) level user login. Used as a group, these three tools provide the CiM-25 with a very high degree of security. Each of these tools is described in more detail below:

3.2.1 SECURITY TOOLS

3.2.1.1 USER LOGIN

For the HTTP interfaces the CiM-25 provides three (3) levels of user login. The Telnet interface, provides the first two (2) of the following levels. The highest level is the **Administrator** login. This level allows 100% complete access to all controllable CiM-25 and equipment parameters. The next level of user login is the **Read/Write** level. This level allows access to all controllable equipment parameters but does not allow access to the administration parameters of the CiM-25 itself. The lowest level of login is the **Read Only** login. As the name implies, this level allows the user to view, but not change, the equipment parameters. Like the **Read/Write** level, this level does not allow access to the administration parameters of the CiM-25.

The Name and Password factory defaults for the three level defined above are:

- ▶ Administrator Level:
 - ▶ Name: **admin**
 - ▶ Password: **1234**
- ▶ Read/Write Level:
 - ▶ Name: **opccenter**
 - ▶ Password: **1234**
- ▶ Read Only Level:
 - ▶ Name: **monitor**
 - ▶ Password: **1234**

The SNMP interface uses all three (3) levels of user login utilizing the SNMP v2c (community string) method of security. The community string is the concatenation of the name and password, i.e. **admin1234**, default admin community string.

The SNMP interface uses all three (3) levels of user login utilizing the SNMP v2c (community string) method of security. The community string is the concatenation of the name and password, i.e. **admin1234**, default admin community string.

3.2.1.2 HOST ALLOW LIST

The CiM-25 provides a high degree of security by allowing the Administrator to define a list of IP addresses to which the CiM-25 will accept/respond to IP datagrams. The Administrator can select up to six (6) individual allowable IP addresses or up to three (3) allowable IP address ranges or any combination of individual and ranges that can be defined by six fields (see HTTP interface below for further details). The host allow list is applied to all three CiM-25 interfaces (HTTP, SNMP, and Telnet).

3.2.1.3 PING ENABLE/DISABLE

The final piece to the CiM-25 security design is the PING Enable/Disable feature. This feature allows the Administrator to disable PING on an individual CiM-25. This in effect conceals the CiM-25 from most hackers.

3.2.2 NETWORK ADMINISTRATION

In addition to the three items described above under Security, the CiM-25 provides the following network administration facilities:

- ▶ Configure IP Address, IP Gateway, and IP Mask.
- ▶ Select Primary and Secondary DNS server IP addresses.
- ▶ Select SMTP domain Name and IP address.
- ▶ Select SNMP Trap IP address and Trap Community string.

3.3 HTTP INTERFACE

This section of this document will explain the HTTP (Web Server) interface provided by the CiM-25/300L2/3.

3.3.1 LOCAL LAN CONFIGURATION

The web page interface is best viewed at **1152 x 864** resolution using Internet Explorer 5.5 or higher and a 17" or larger monitor.

3.3.1.1 HTTP 1.1

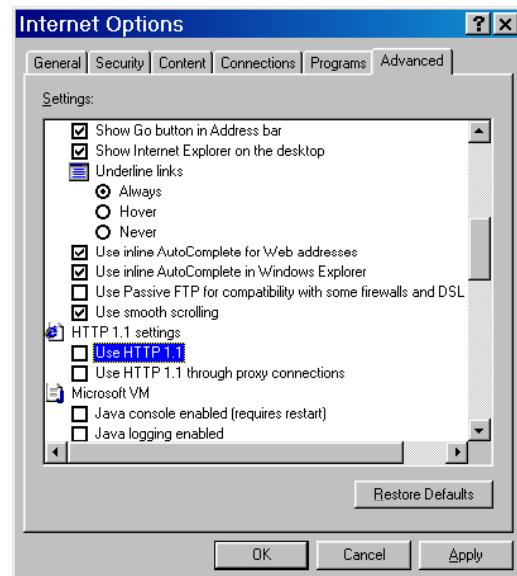

For best performance, HTTP 1.1 should be disabled. It can be changed as follows:

Step Procedure

1. Click **Start**, **Settings**, then **Control Panel**.
2. Double-click the **Internet Options** icon in the Control Panel.
3. Under the **Advanced** tab, scroll down to **HTTP 1.1 settings**.
4. Uncheck the **Use HTTP 1.1** box and click **OK**.

Example

3.3.1.2 PROXY SERVER

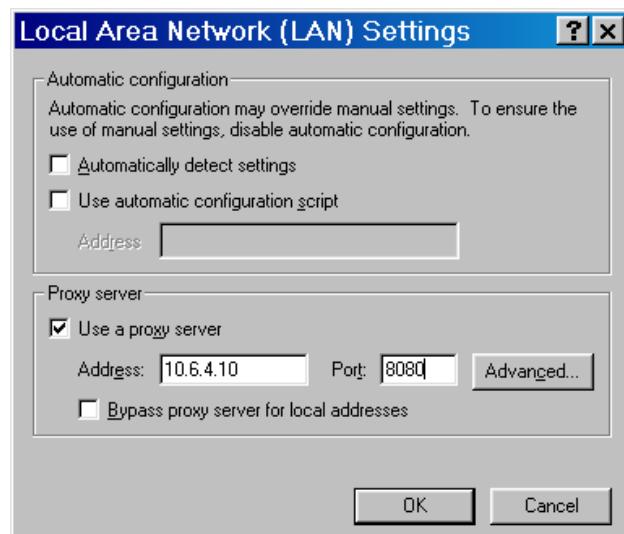

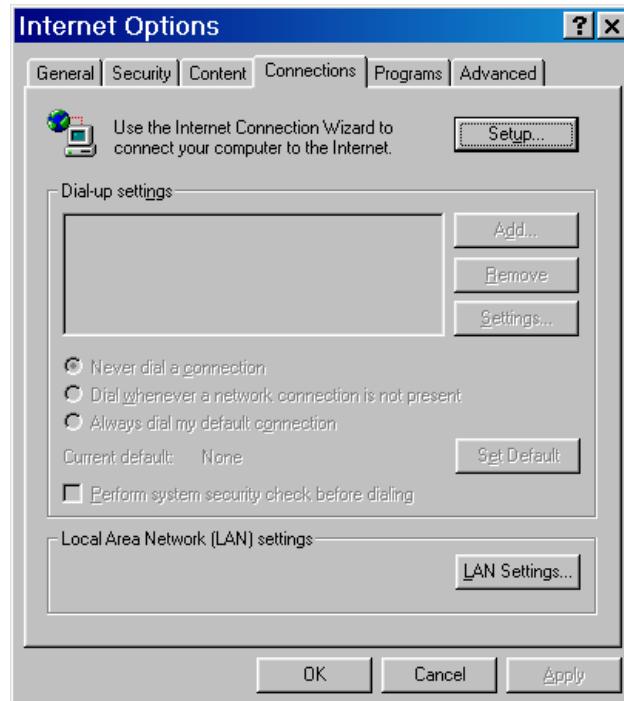

If your network uses a proxy server, it may be necessary to disable the use of it for the browser to work. It can be changed as follows:

Step Procedure

1. Click **Start**, **Settings**, then **Control Panel**.
2. Double-click the **Internet Options** icon in the Control Panel.
3. Under the **Connections** tab, click the **LAN Settings** button.
4. At this point you must do one of the following:
 - a. Uncheck the **Use a proxy server** box and click **OK**.
or
 - b. Click the **Advanced** button and go to the next step.

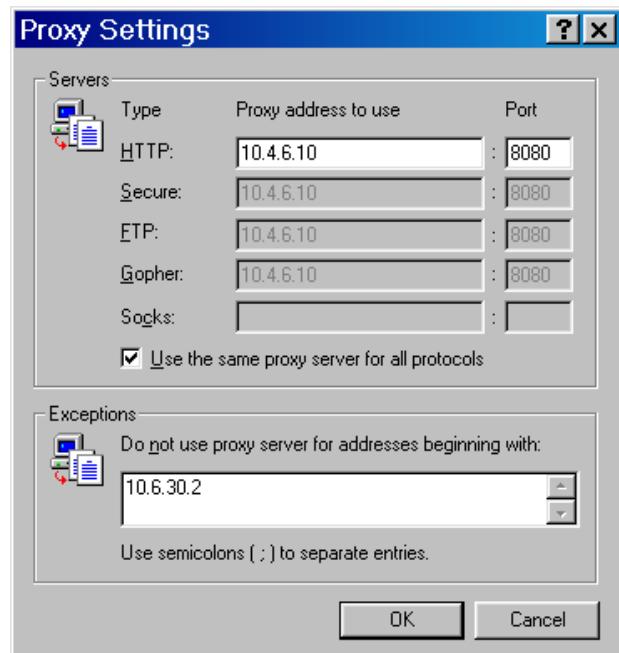

Example

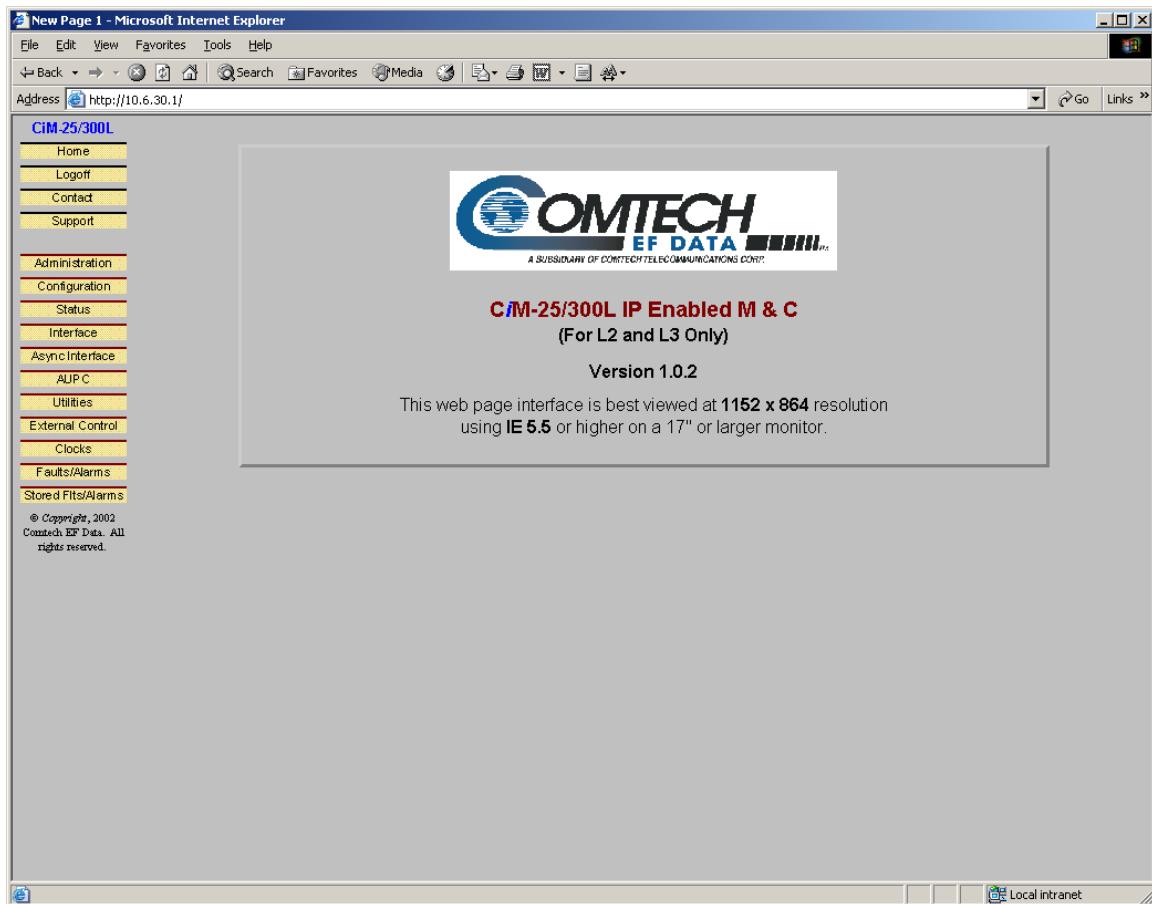

Step Procedure

5. In the **Exceptions** box, enter the IP address of the CiM module and click **OK**.

Example

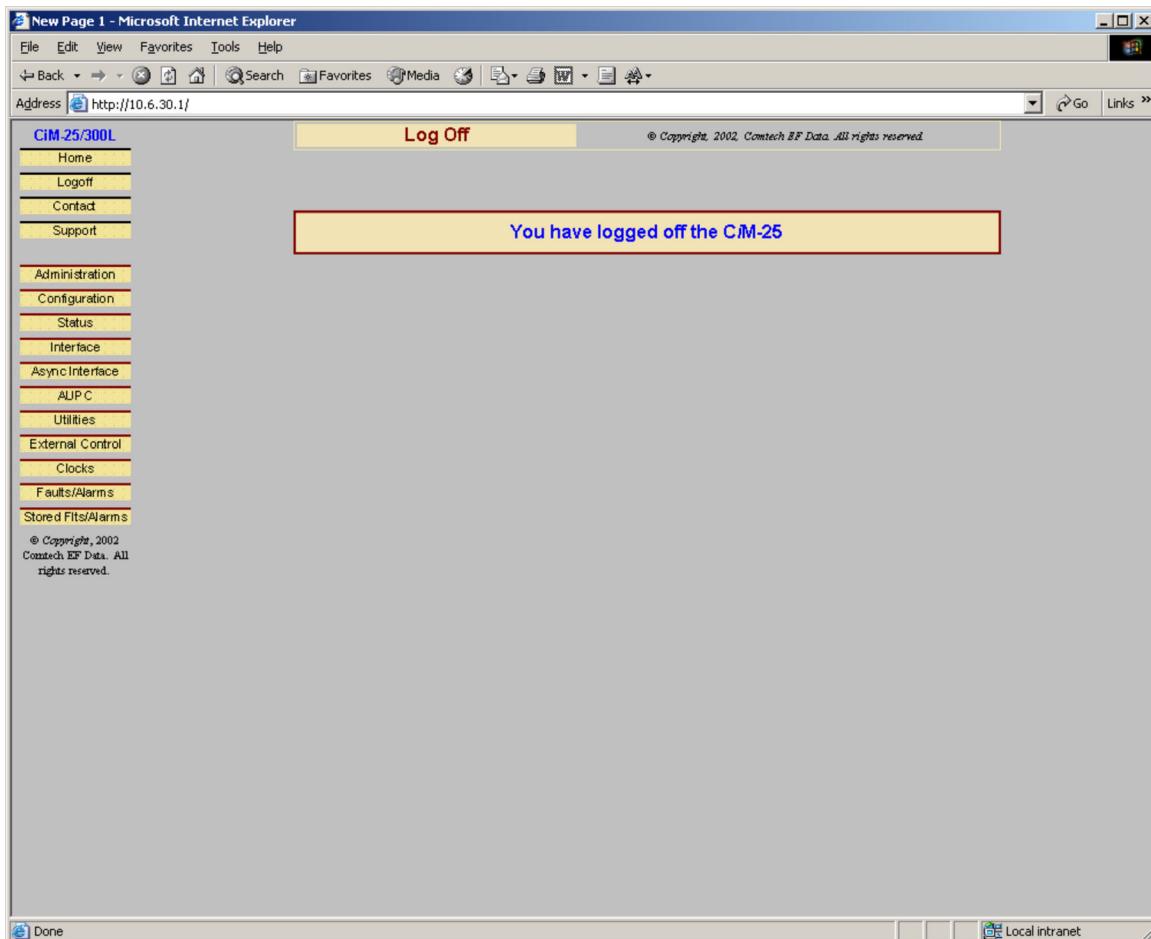

3.3.2 HOME PAGE

Welcome to the CiM-25/300L2/3 Web Interface. The following sections will give you a brief introduction to each web page available.

3.3.3 LOGOFF PAGE

The CiM-25 allows multiple connections to the Web Interface. The Web Interface and Telnet Interface cannot be used at the same time. You must logoff the Web Interface in order to log into the Telnet Interface and vice versa.

3.3.4 CONTACT INFORMATION PAGE

The screenshot shows a Microsoft Internet Explorer window with the title "New Page 1 - Microsoft Internet Explorer". The address bar displays "http://10.6.30.1/". The main content area is titled "Contact Comtech EF Data" and includes copyright information: "© Copyright 2002, Comtech EF Data. All rights reserved." On the left, there is a vertical navigation menu under "CIM-25/300L" with the following items: Home, Logoff, Contact, Support, Administration, Configuration, Status, Interface, Async Interface, ALIP C, Utilities, External Control, Clocks, Faults/Alarms, and Stored Fits/Alarms. Below this is a copyright notice: "© Copyright 2002 Comtech EF Data. All rights reserved." The central content area is divided into three columns: "VIA", "Sales", and "Service". Under "VIA", there are icons for e-mail, fax, and web. The "Sales" column lists "sales@comtechedfdata.com" and phone numbers "(480) 333-2177" and "(480) 333-2540". The "Service" column lists "cimfss@comtechedfdata.com" and phone numbers "(480) 333-4357" and "(480) 333-2500". Below this, a message says "For product information online, please visit our website at: www.comtechedfdata.com". An icon of a CD-ROM is shown next to the text "Now available on CD-ROM:" followed by a bulleted list: Product Data Sheets, Software Demos, Application Notes, Manuals, and Contact information, and more. At the bottom, it says "To request a CD-ROM, call (480) 333-2473 or email: sales@comtechedfdata.com". The status bar at the bottom right shows "Local intranet".

This page provides basic contact information to reach ComTech EF Data Sales and Customer Service via phone or automated e-mail links.

3.3.5 SUPPORT PAGE (COMMON)

In order to use the Support functions, the user must first assign SMTP a domain name and IP address. Refer to 3.3.6.8, SMTP Domain Name and IP Address.

The Support page is accessible by ALL logged in users. This page allows the user to automatically E-mail Comtech EF Data's Customer Support center. The user MUST fill in the **Name**, **Company**, **E-mail Address**, and **Telephone** information boxes. In addition, the user must enter some description of the problem or question into the **Problem Report** field. The CiM-25 will automatically retrieve and attach pertinent information about the equipment (such as Equipment ID, Serial Number, Configuration, and Status) to the E-mail message. This will allow Comtech EF Data Customer Support personal to provide faster and more accurate responses to customer needs.

3.3.6 ADMINISTRATION PAGE (COMMON)

The screenshot shows the 'Administration' page of the CiM-25/300L2/3 IP Enabled M&C interface. The left sidebar contains navigation links for Home, Logoff, Contact, Support, Administration, Configuration, Status, Interface, Async Interface, ALIP C, Utilities, External Control, Clocks, Faults/Alarms, and Stored Flts/Alarms. The main content area is titled 'Administration' and includes the following sections:

- System Account Information:** Fields for Administrator Name (admin), Administrator Password (1234), Read/Write (opcenter), Read/Write Password (aaaa), Read Only (monitor), Read Only Password (aaaa), and SMTP Domain IP Address (000.000.000.000).
- Host Allow List - Enter IP Address of Authorized Host:** A table with columns for IP 1 (000.000.000.000), IP 2 (255.255.255.255), IP 1/2 Range (radio buttons for Yes or No), IP 3 (000.000.000.000), IP 4 (000.000.000.000), IP 3/4 Range (radio buttons for Yes or No), IP 5 (000.000.000.000), IP 6 (000.000.000.000), and IP 5/6 Range (radio buttons for Yes or No).
- Network Maintenance:** Fields for Ping (radio buttons for Enabled or Disabled), MAC Address (0006B000042C), IP Address (010.006.030.001), IP Gateway (000.000.000.000), IP Mask (255.255.000.000), DNS 1 (000.000.000.000), DNS 2 (000.000.000.000), Trap IP (010.006.030.001), and Trap Community (public). A 'Submit Admin & Reset' button is at the bottom.

The Administration Page is only available to users who have logged in using the Administrator Name and Password.

3.3.6.1 ADMINISTRATOR NAME AND PASSWORD

The factory defaults for these parameters are **admin** and **1234** respectively. The Name field can be any alpha-numeric combination with a minimum length of 4 characters and a maximum length of 10 characters. The Password field can be any alpha-numeric combination with a minimum length of 4 characters and a maximum length of 10 characters.

3.3.6.2 READ/WRITE NAME AND PASSWORD

The factory defaults for these parameters are **opcenter** and **1234** respectively. The Name field can be any alpha-numeric combination with a minimum length of 4 characters and a maximum length of 10 characters. The Password field can be any alpha-numeric combination with a minimum length of 4 characters and a maximum length of 10 characters.

3.3.6.3 READ ONLY NAME AND PASSWORD

The factory defaults for these parameters are **monitor** and **1234** respectively. The Name field can be any alpha-numeric combination with a minimum length of 4 characters and a maximum length of 10 characters. The Password field can be any alpha-numeric combination with a minimum length of 4 characters and a maximum length of 10 characters.

3.3.6.4 HOST ALLOW LIST

The Host Allow List can be configured as any of the following combinations:

- ▶ 1 to 6 individual IP addresses.
- ▶ 1 to 3 ranges of IP addresses.
- ▶ A combination of individual and range addresses.

The Administrator simply checks the **Range Yes** radio button next to the group of two IP addresses that constitute the beginning and ending of the range.

3.3.6.5 PING ENABLE / DISABLE

The factory defaults for this parameter is **Enabled**. The radio buttons allow the Administrator to choose between **Enabled** and **Disabled**.

3.3.6.6 CIM-25 IP ADDRESS, GATEWAY AND MASK

The factory defaults for these parameters are **10.6.30.1**, **0.0.0.0**, and **255.255.0.0** respectively. The Administrator can change these as required.

3.3.6.7 DNS SERVERS

The Administrator can assign both a primary and secondary DNS server IP address.

3.3.6.8 SMTP DOMAIN NAME AND IP ADDRESS

The Administrator can assign the SMTP Domain Name and Domain IP Address. This is required if the E-mail feature of the Support Page is to be used.

3.3.6.9 SNMP TRAP IP ADDRESS

The Administrator can assign a SNMP Trap IP address.

3.3.6.10 SNMP TRAP COMMUNITY

The factory default for this parameter is public. The Administrator can assign a SNMP Trap Community. The SNMP Trap Community field can be any combination of characters and a length of 0 - 20 characters.

3.3.6.11 MAC ADDRESS

This is a READ ONLY parameter and can not be changed.

Transmit

Modulator Type: INTELSAT

Frequency: 1200.0000 MHz

Data Rate: 38.4 Kbps

Coder Rate: 1/2_QPSK

Encoder Type: Viterbi

Reed-Solomon: Off Interleaver: 4

IESS-310 Mode: Off

Spectrum: Normal

Scrambler: On

Differential Encoder: On

BPSK Bit Ordering: Normal

Power Level: -10.0 dBm

Power Level Offset: +0.0 dBm

RF Output: Off

FSK Output: Off (For SDM-300L3 Only)

Receive

Demodulator Type: INTELSAT

Frequency: 1200.0000 MHz

Data Rate: 38.4 kbps

Coder Rate: 1/2_QPSK

Decoder Type: Viterbi

Reed-Solomon: Off Interleaver: 4

IESS-310 Mode: Off

Spectrum: Normal

De-Scrambler: On

Differential Decoder: On

BPSK Bit Ordering: Normal

Sweep Center Frequency: -0 Hz

Sweep Width Range: 60000 Hz

Sweep Reacquisition: 0 Seconds

Submit Tx & Rx Configuration

This page can be viewed by all three levels of user login. However, only user with Administrative or Read/Write privileges can submit changes to this page. This page allows the user to configure the primary Transmit and Receive Parameters of a SDM-300L2 & 3 Modem.

3.3.8 STATUS PAGE

The screenshot shows a Microsoft Internet Explorer window displaying the 'Modem Status' page for the CiM-25/300L2/3 system. The left sidebar contains a navigation menu with items like Home, Logoff, Contact, Support, Administration, Configuration, Status, Interface, Async Interface, ALPC, Utilities, External Control, Clocks, and Faults/Alarms. The main content area is titled 'Modem Status' and includes sections for 'General Information', 'RX Parameters', 'M&C Firmware Info', 'Boot M&C Firmware Info', and 'Data ROM Firmware Info'. The 'General Information' section shows Equipment Type as SDM300L-2_2.1.12, Serial Number as 011445019, and Modem card details (Card 1: OH_01, Card 2: RS_02, Card 3: RS_03). The 'RX Parameters' section lists Raw BER, Corrected BER, Eb/No, Rx Signal, Sweep Freq, Buffer Fill State, Frame Errors, LNB Current, and ODU Current. The 'M&C Firmware Info' section shows Version 2.1.12, Number FW/8460-1M, and Date 06/17/02. The 'Boot M&C Firmware Info' section shows Version 1.1.1, Number FW/8699-, and Date 02/24/00. The 'Data ROM Firmware Info' section shows Number FW/9405A, Date 07/20/01, and Turbo Not Installed.

General Information	
Equipment Type	SDM300L-2_2.1.12
Serial Number	011445019
Modem	
Card 1	OH_01
Card 2	RS_02
Card 3	RS_03

RX Parameters	
Raw BER	No Data
Corrected BER	No Data
Eb/No	No Data
Rx Signal	<-91.9dBm
Sweep Freq	No Data
Buffer Fill State	50 %
Frame Errors	2047_No Data
LNB Current	No Data
ODU Current	No Data

M&C Firmware Info	
Version	2.1.12
Number	FW/8460-1M
Date	06/17/02

Boot M&C Firmware Info	
Version	1.1.1
Number	FW/8699-
Date	02/24/00

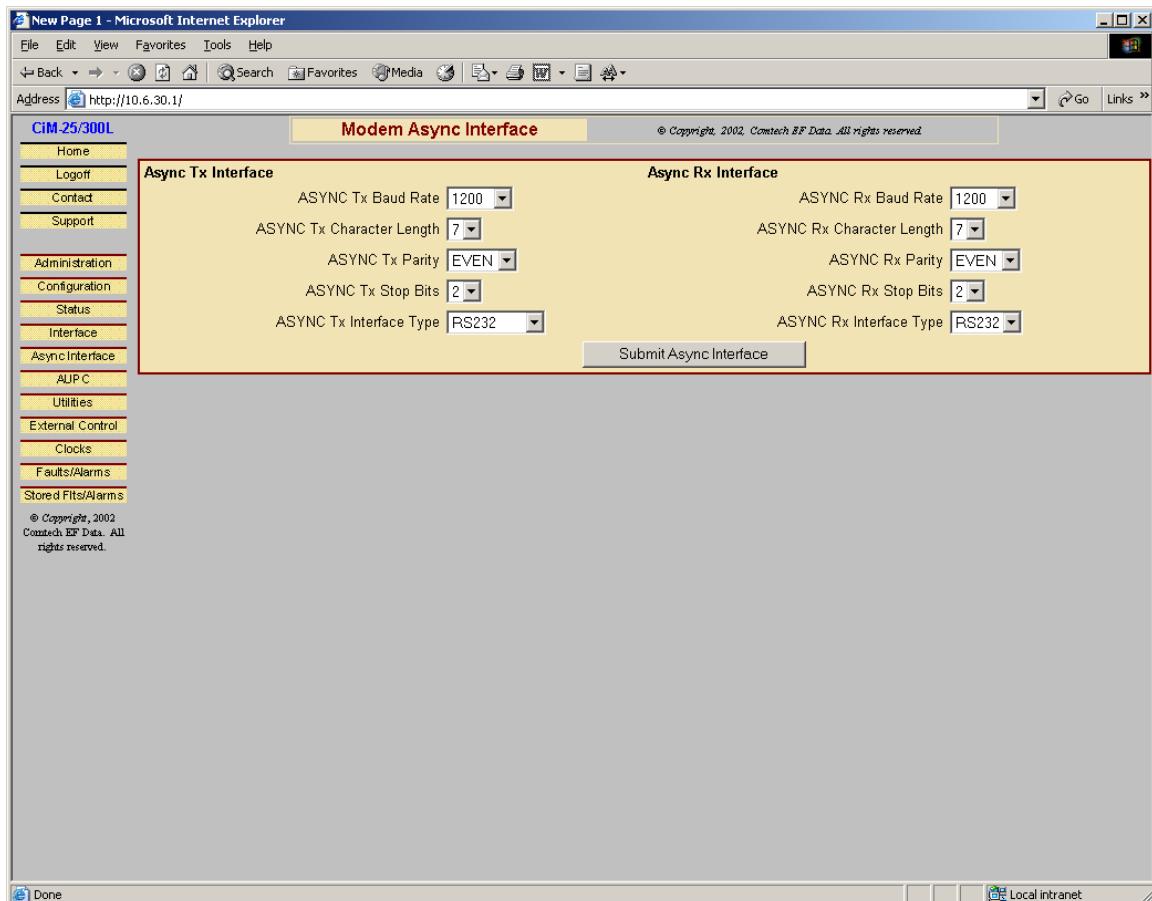

Data ROM Firmware Info	
Number	FW/9405A
Date	07/20/01
Turbo	Not Installed

This page can be viewed by all three levels of user login. This is a Read Only Page and has no submit button. This page provides various status information for a SDM-300L2 & 3 Modem.

3.3.9 INTERFACE PARAMETERS PAGE (Tx/Rx)

This page can be viewed by all three levels of user login. However, only user with Administrative or Read/Write privileges can submit changes to this page. This page allows the user to configure the Transmit and Receive Interface Parameters of a SDM-300L2 & 3 Modem.

3.3.10 ASYNCHRONOUS INTERFACE PAGE

This page can be viewed by all three levels of user login. However, only user with Administrative or Read/Write privileges can submit changes to this page. This page allows the user to configure the Asynchronous Interface Parameters of a SDM-300L2 & 3 Modem.

3.3.11 UTILITIES PAGE

The screenshot shows the 'Modem Utilities' page of the CiM-25/300L2/3 interface. The left sidebar contains navigation links for Home, Logoff, Contact, Support, Administration, Configuration, Status, Interface, Async Interface, ALP C, Utilities, External Control, Clocks, and Faults/Alarms. The main content area is divided into four sections:

- Test Modes**: Contains dropdown menus for Tx 2047 Pattern (OFF), Rx 2047 Pattern (OFF), IF Loopback (OFF), Interface Loopback (OFF), Interface Loop Timing (OFF), and Baseband Loopback (OFF). Below these is a 'Submit Utilities Test Modes' button.
- Miscellaneous Controls**: Contains dropdown menus for CTS Delay Time (0 Seconds), Carrier Only Mode (OFF), RTS TX-IF Control Mode (OFF), RF Mode Control (NRM), BER Threshold (NONE), Operation Mode (DUPLEX), and System Type (CUSTOM). Below these is a 'Submit Utilities Misc Controls' button.
- Service Channel Adjustments**: Contains four input fields for Tx1 (-5 dBm), Tx2 (-5 dBm), Rx1 (-5 dBm), and Rx2 (-5 dBm). Below these is a 'Submit Service Channel Adjustments' button.
- Backward Alarm Controls**: Contains eight dropdown menus for Tx1 (ON), Tx2 (ON), Tx3 (ON), Tx4 (ON) and Rx1 (ON), Rx2 (ON), Rx3 (ON), Rx4 (ON). Below these is a 'Submit Backward Alarm Settings' button.

At the bottom of the page, there are three input fields: 'Submit Util Time/Date' (11:47, Format is 24 Hour, HH:MM), '11/15/02' (Format is MM/DD/YY or MM/DD/YYYY), and a 'Done' button.

This page can be viewed by all three levels of user login. However, only user with Administrative or Read/Write privileges can submit changes to this page. This page allows the user to configure various utility functions on a SDM-300L2 & 3 Modem.

3.3.12 EXTERNAL CONTROL PAGE

The screenshot shows the 'External Control' page of the CiM-25/300L2/3 IP Enabled M&C Operation interface. The page is titled 'External Control' and includes a copyright notice: '© Copyright, 2002, Comtech EF Data. All rights reserved.'

LNB Control: Includes fields for LNB Power (OFF), LNB Current Threshold Low (0 mA), LNB Current Threshold High (500 mA), LNB Voltage (13), and LNB Ref Enable (OFF). A 'Submit LNB Controls' button is present.

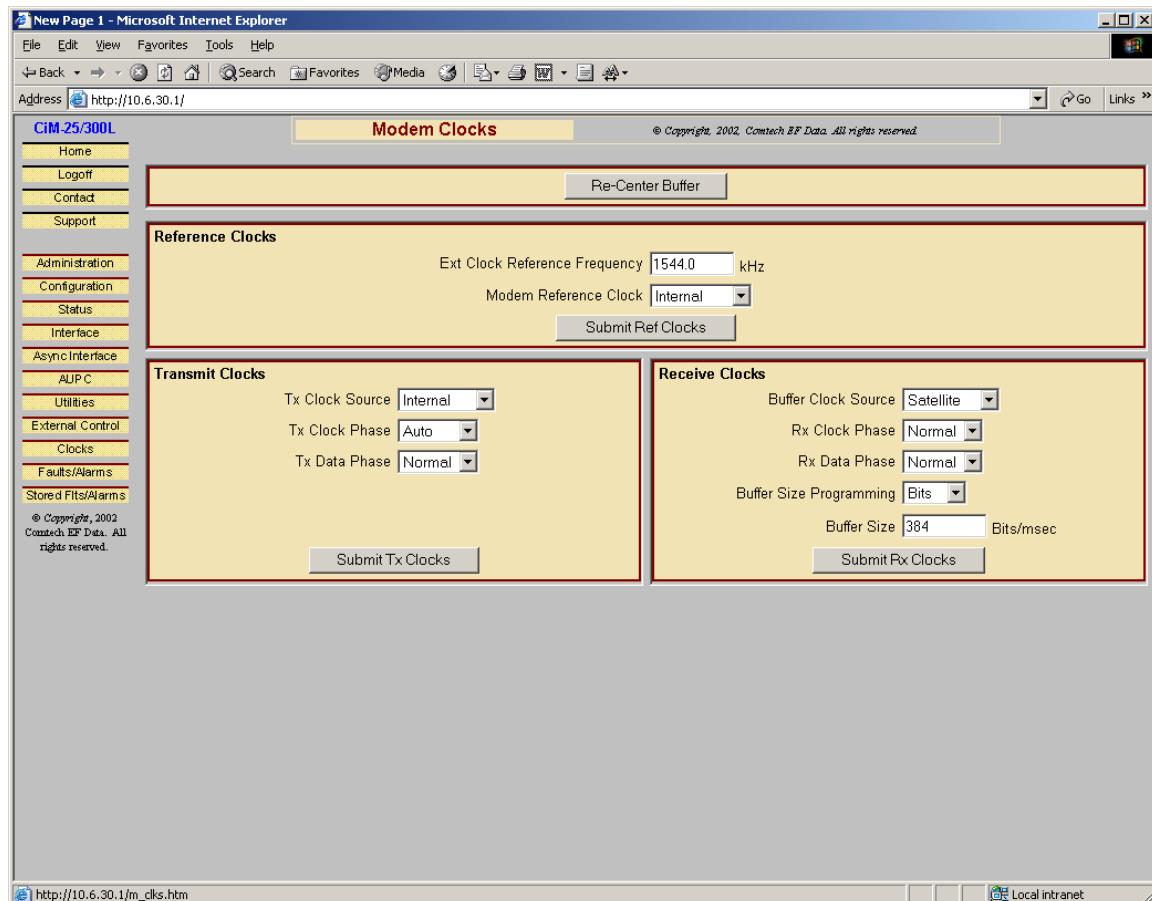

ODU Control: Includes fields for ODU Power (ON), ODU Current Threshold Low (0 mA), ODU Current Threshold High (2000 mA), ODU Ref Enable (OFF), ODU TX Output (OFF), ODU Power Leveling (OFF), and ODU Power Leveling (For SDM-300L3 Only). A 'Submit ODU Controls' button is present.

ODU Status (For SDM-300L3 Only): Displays ODU Temperature (N/A), ODU Phase Lock Loop (N/A), ODU Software Version (N/A), and ODU Power Class (N/A Watt).

The left sidebar lists navigation options: Home, Logoff, Contact, Support, Administration, Configuration, Status, Interface, Async Interface, AJPC, Utilities, External Control (highlighted in red), Clocks, and Faults/Alarms. The bottom of the page also displays the copyright notice: '© Copyright, 2002, Comtech EF Data. All rights reserved.'

This page can be viewed by all three levels of user login. However, only user with Administrative or Read/Write privileges can submit changes to this page. This page allows the user to configure LNB and ODU parameters for a SDM-300L2 & 3 Modem.

3.3.13 CLOCKS PAGE

This page can be viewed by all three levels of user login. However, only user with Administrative or Read/Write privileges can submit changes to this page. This page allows the user to configure various clock functions of the SDM-300L2 & 3 Modem.

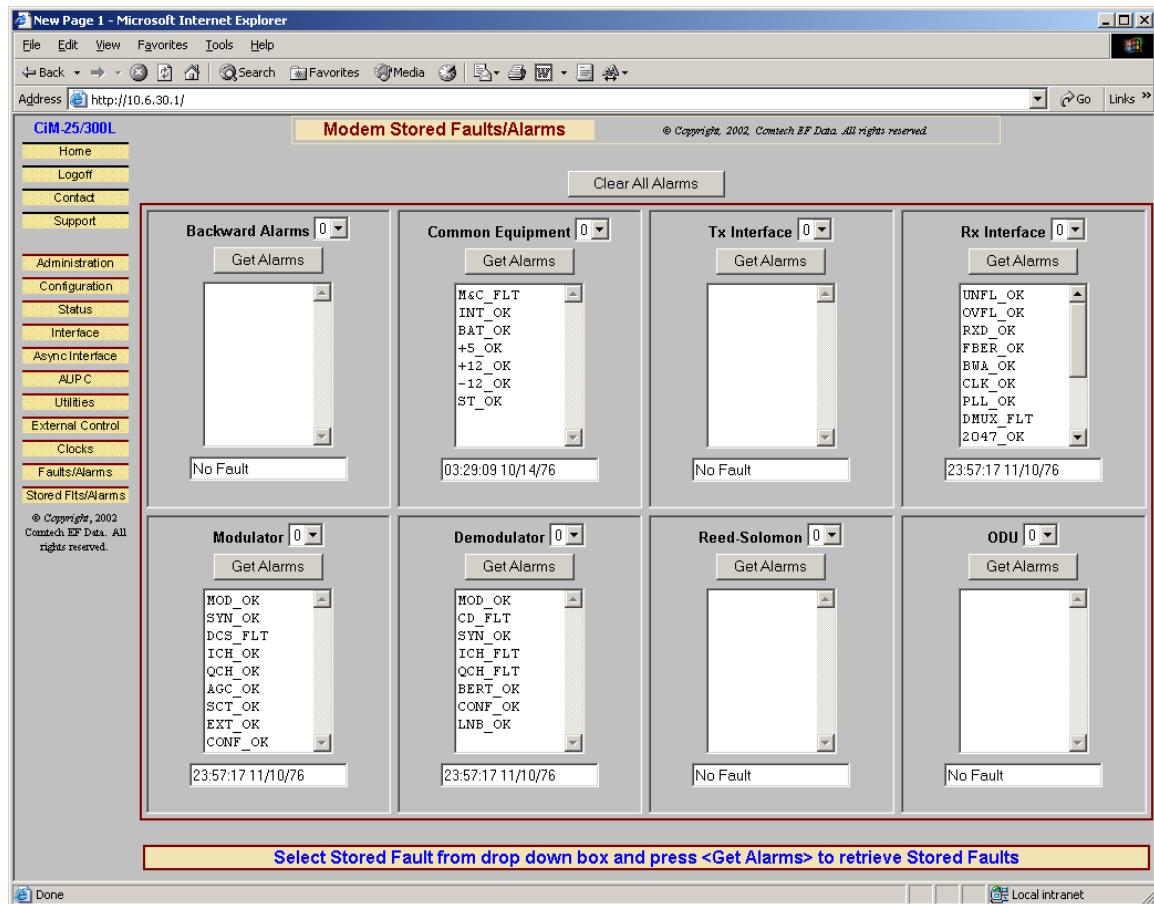

3.3.14 FAULTS/ALARMS PAGE

The screenshot shows the 'Modem Faults/Alarms' page from the CiM-25/300L2/3 IP Enabled M&C Operation interface. The left sidebar menu includes Home, Logoff, Contact, Support, Administration, Configuration, Status, Interface, Async Interface, ALPC, Utilities, External Control, Clocks, and a selected 'Faults/Alarms' option. The main content area is titled 'Modem Faults/Alarms' and contains several sections:

- Modem Flt Summary:** Lists faults like DHD_FLT, MOD_FLT, ITX_OK, IRX_OK, CEQ_OK, BWAL_OK, and ODU_OK.
- Common Equipment Faults:** Lists faults like M&C_OK, INT_OK, BAT_OK, +5_OK, +12_OK, -12_OK, ST_OK, MODE_REMOTE, and SFLT_2.
- Tx Interface Faults:** Lists faults like DRP_OK, TXD_OK, PLL_OK, CLK_OK, TAC1_OK, TAC2_OK, CONF_OK, IPM_OK, and SFLT_0.
- Rx Interface Faults:** Lists faults like UNFL_OK, OVFL_OK, RXD_OK, FBER_OK, BWA_OK, CLK_OK, PLL_OK, DMUX_OK, 2047_OK, BUFF_OK, and INS_OK.
- Backward Alarms:** Lists alarms like TXBWA1_OK, TXBWA2_OK, TXBWA3_OK, TXBWA4_OK, RXBWA1_OK, RXBWA2_OK, RXBWA3_OK, RXBWA4_OK, and SFLT_0.
- Mod Faults:** Lists faults like RF_OFF, MOD_OK, SYN_OK, DCS_FLT, ICH_OK, QCH_OK, AGC_OK, SCT_OK, EXT_OK, CONF_OK, and SFLT_1.
- Demod Faults:** Lists faults like MOD_OK, CD_FLT, SYN_OK, ICH_OK, QCH_OK, BERT_OK, CONF_OK, LNB_OK, and SFLT_10.
- ODU Status:** Lists status items like CURRENT_OK, VOLTAGE_OK, and SFLT_0.

This page can be viewed by all three levels of user login. This is a read-only page. This page allows the user to view current Faults and Alarms of the SDM-300L2 & 3 modem.

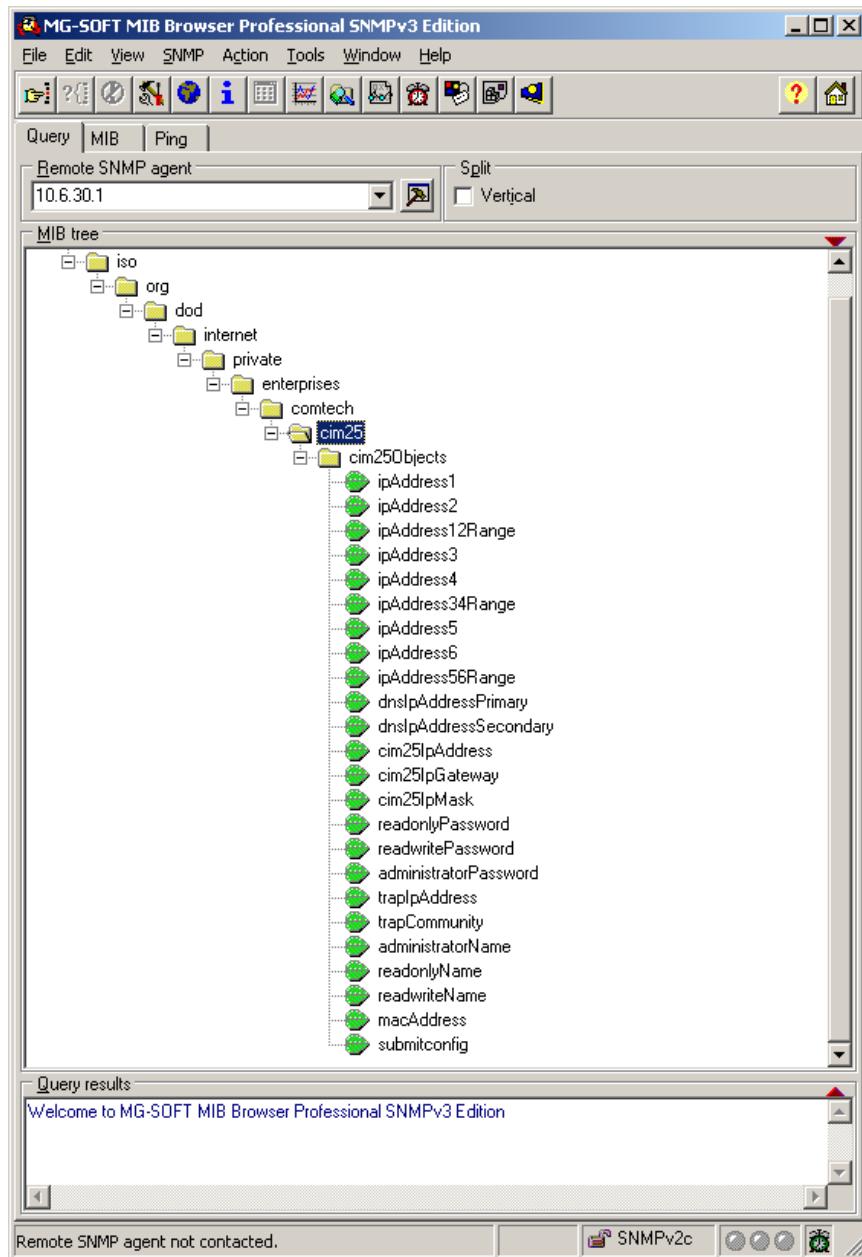

3.3.15 STORED FAULTS/ALARMS PAGE

This page can be viewed by all three levels of user login. This is a read/write page. This page allows the user to view various Stored Faults and Alarms of the SDM-300L2 & 3 Modem. Select the desired Stored Alarm and click the **Get Alarm** button to retrieve it.

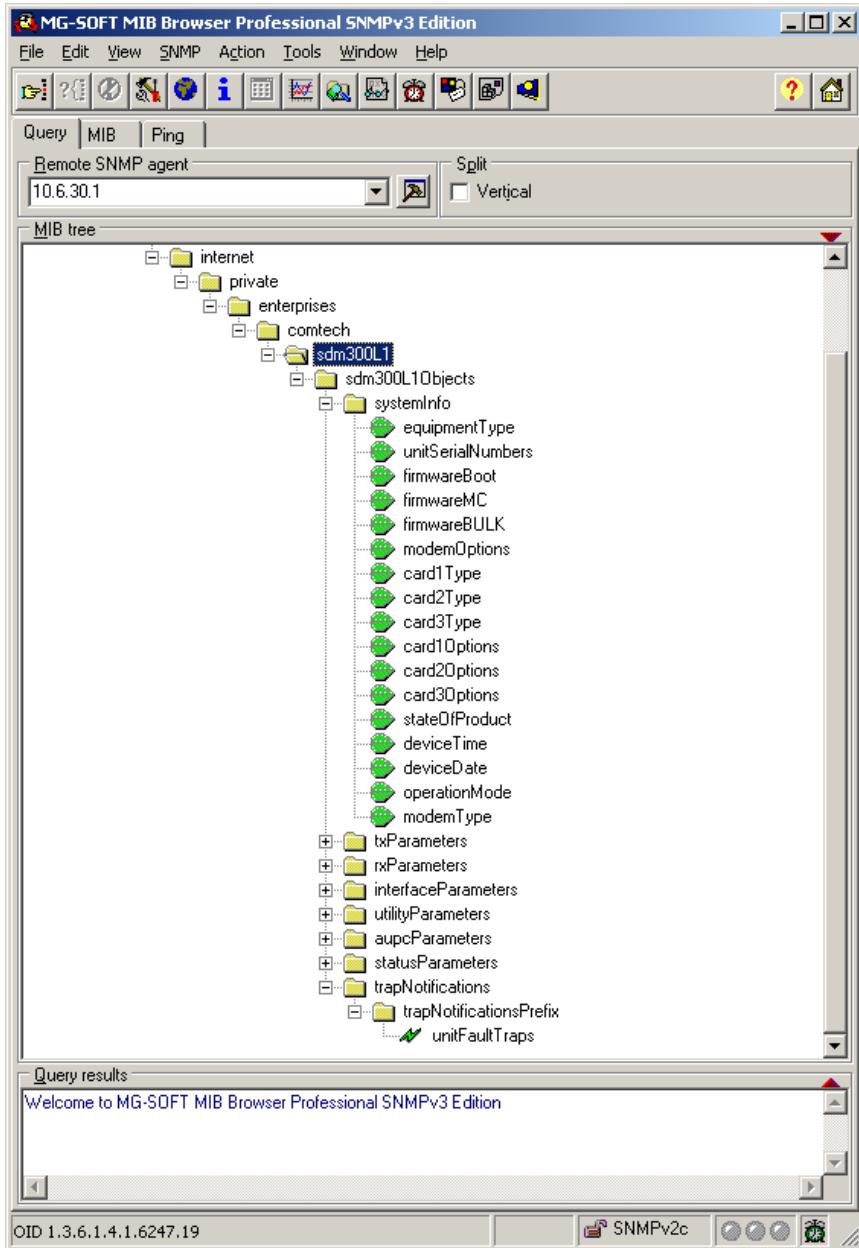

3.4 SNMP INTERFACE

The CiM-25 supports v2c version of the industry standard SNMP (Simple Network Management Protocol). The CiM-25 supports a complete private MIB for the attached equipment as well as a private MIB for the CiM-25 itself. The SNMP interface supports standard Get and Set as well as **Branch Walking**.

The image above is a screen dump of the CiM-25 MIB structure using a common MIB Browser. The important point here is that all administrative parameters of the CiM-25 are available in its private MIB.

The image below is a screen dump of the SDM-300L2 & 3 MIB using a common MIB Browser. The important point here is that all SDM-300L2 & 3 Controllable Parameters and Status Parameters are available in its private SDM-300L2 & 3 MIB.

3.5 TELNET INTERFACE

The CiM-25 provides a Telnet interface for three primary functions:

- ▶ System Administration.
- ▶ Equipment M&C via the standard equipment Remote Control protocol.
- ▶ Equipment M&C via Comtech EF Data PC based Monitor and Control applications.

The Telnet interface uses two (2) levels of user login, **Administrator** and **Read/Write**. The screen dump below shows the login process.

The screenshot shows a Windows command-line window with the title bar 'C:\WINNT\System32\telnet.exe'. The window content displays the following text:
COMTECH EF/DATA CIM-25 TELNET INTERFACE
Product: Satellite Modem
Product Address: 0000
You must have an account to use this interface.
Please see your administrator.
Enter name: admin
Enter password: 1234
Name and Password accepted. Please review your modem manual for command syntax.
<?=Menu Q=Quit> Telnet-->

Once logged into the CiM-25 Telnet interface as the Administrator the user can use the built in menu function by typing a ? (question mark). This menu is only available to the Administrator. The screen dump below shows the functions available via this menu system. Entering any command without any data parameters will cause the CiM-25 to respond with a message that provides the proper formatting requirements for the individual command. Entering any command with a ? (question mark) as the parameter will cause the CiM-25 to respond with the current Set value. Each command will be explained in the following section.

The screenshot shows a Windows Telnet window titled 'C:\WINNT\System32\telnet.exe'. The title bar also displays 'COMTECH EF/DATA CIM-25 TELNET INTERFACE'. The window content includes the following text:

```
Product: Satellite Modem
Product Address: 0001

You must have an account to use this interface.
Please see your administrator.

Enter name: admin
Enter password: 1234
Name and Password accepted. Please review your modem manual for command syntax.

3.5.1 TELNET ADMINISTRATIVE FUNCTIONS

3.5.1.1 CHANGE IP ADDRESS, GATEWAY AND MASK

Using the **!IP** command, the Administrator can change the IP Address, IP Gateway, and IP Mask. The command protocol for this command is as follows:

Format: **!IP <ip> <gateway> <mask>**

Example: **!IP 10.6.30.2 10.6.30.255 255.255.0.0**

Query Format: **!IP ?**

Response: **!IP 10.6.30.2 10.6.30.255 255.255.0.0**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.2 CHANGE HOST ALLOW LIST

Using the **!HA** command, the Administrator can modify the Host Allow List. The command protocol for this command is as follows:

Format: **!HA <address index> <ip_address> <ranged>**
Where: address index is 1 to 6, ranged is 0 if No and 1 if yes

Example: **!HA 5 10.50.91.200 0**

This sets IP address #5 to 10.50.91.200 and indicates addresses #5 & #6 are NOT ranged.

Query Format: **!HA ?**
Response: IP 1: 000.000.000.000 IP 2: 255.255.255.255 Range = yes
 IP 3: 000.000.000.000 IP 4: 000.000.000.000 Range = no
 IP 5: 000.000.000.000 IP 6: 000.000.000.000 Range = no

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.3 CHANGE ADMINISTRATOR NAME

Using the **!AD** command, the Administrator can change the Administrator login Name. The command protocol for this command is as follows:

Format: **!AD <string>**
Where: <string> can be any alphanumeric string of length 4 to 10 characters

Query Format: **!AD ?**
Response: **!AD <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.4 CHANGE ADMINISTRATOR PASSWORD

Using the **!PW** command, the Administrator can change the Administrator login Password. The command protocol for this command is as follows:

Format: **!PW <string>**
Where: <string> can be any alphanumeric string of length 4 to 10 characters

Query Format: **!PW ?**
Response: **!PW <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.5 CHANGE READ/WRITE NAME

Using the **!WN** command, the Administrator can change the Read/Write login Name. The command protocol for this command is as follows:

Format: **!WN <string>**

Where: <string> can be any alphanumeric string of length 4 to 10 characters

Query Format: **!WN ?**

Response: **!WN <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.6 CHANGE READ/WRITE PASSWORD

Using the **!WP** command, the Administrator can change the Read/Write login Password. The command protocol for this command is as follows:

Format: **!WP <string>**

Where: <string> can be any alphanumeric string of length 4 to 10 characters

Query Format: **!WP ?**

Response: **!WP <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.7 CHANGE READ ONLY NAME

Using the **!RN** command, the Administrator can change the Read Only login Name. The command protocol for this command is as follows:

Format: **!RN <string>**

Where: <string> can be any alphanumeric string of length 4 to 10 characters

Query Format: **!RN ?**

Response: **!RN <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.8 CHANGE READ ONLY PASSWORD

Using the **!RP** command, the Administrator can change the Read/Only login Password. The command protocol for this command is as follows:

Format: **!RP <string>**

Where: <string> can be any alphanumeric string of length 4 to 10 characters

Query Format: **!RP ?**

Response: **!RP <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.9 ENABLE OR DISABLE PING

Using the **!PG** command, the Administrator can either enable or disable PING. The command protocol for this command is as follows:

Format: **!PG <state>**

Where: 0 = Disabled, 1 = Enabled

Query Format: **!PG ?**

Response: **!PG <state>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.10 COMMIT CHANGES TO EEPROM

Using the **!EE** command, the Administrator can commit any previously commanded changes to EEPROM. This will store the new operating parameters and automatically do a warm reboot of the CiM-25/300L2/3. The command protocol for this command is as follows:

Format: **!EE**

3.5.1.11 CHANGE PRIMARY/SECONDARY DNS IP ADDRESSES

Using the **!DN** command, the Administrator can set the primary and secondary DNS IP Addresses. The command protocol for this command is as follows:

Format: **!DN <primary DNS IP Address> <secondary DNS IP Address>**
Response: Command Successful

Query Format: **!DN ?**
Response: **!DN <primary DNS IP Address> <secondary DNS IP Address>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.12 CHANGE SMTP DOMAIN NAME

Using the **!SN** command, the Administrator can set the SMTP domain name. The command protocol for this command is as follows:

Format: **!SN <string>**
Response: **Command Successful**
Where: <string> can be any alphanumeric string with a length of 1 to 100 characters.

Note: **disabled** in the <string> field disables SMTP.

Query Format: **!SN ?**
Response: **!SN <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.13 CHANGE SMTP DOMAIN IP ADDRESS

Using the **!SD** command, the Administrator can set the SMTP Domain IP Address. The command protocol for this command is as follows:

Format: **!SD <ip_address>**
Response: **Command Successful**

Note: An IP Address of **0.0.0.0** disables SMTP.

Query Format: **!SD ?**
Response: **!SD <ip_address>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.14 CHANGE HTTP PORT

Using the **!PT** command, the Administrator can set the HTTP Port. The command protocol for this command is as follows:

Format: **!PT <value>**

Response: **Command Successful**

Where <value> can be any number in the range of 0 to 65535

Query Format: **!PT ?**

Response: **!PT <value>**

- Notes:**
1. The default port is set to 80.
 2. Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.15 CHANGE SNMP TRAP IP ADDRESS

Using the **!TP** command, the Administrator can set the SNMP Trap IP Address. The command protocol for this command is as follows:

Format: **!TP <ip_address>**

Response: **Command Successful**

Note: An IP Address of **0.0.0.0** disables the trap

Query Format: **!TP ?**

Response: **!TP <ip_address>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.1.16 CHANGE SNMP TRAP COMMUNITY

Using the **!TC** command, the Administrator can set the SNMP Trap Community. The command protocol for this command is as follows:

Format: **!TC <string>**

Response: **Command Successful**

where <string> can be 0 - 20 characters

Query Format: **!TC ?**

Response: **!TC <string>**

Note: Changes made via this command do not become active until the user has sent a **!EE** command to commit the changes to EEPROM of the CiM-25.

3.5.2 USING TELNET WITH EQUIPMENT REMOTE CONTROL PROTOCOL

The CiM-25/300L2/3 Telnet interface will accept any command defined in the particular interfacing equipments Remote Control Specification. See the equipments Operation Manual for details regarding the available commands and the message protocol. The screen dump below show an example of how to directly use the equipments Remote Control Protocol to communicate to the equipment via the Telnet interface.

```
C:\WINNT\System32\telnet.exe
COMTECH EF/DATA CIM-25 TELNET INTERFACE

Product: Satellite Modem
Product Address: 0001

You must have an account to use this interface.
Please see your administrator.

Enter name: admin
Enter password: 1234
Name and Password accepted. Please review your modem manual for command syntax.

<?=Menu Q=Quit> Telnet-->1/ET_
>1/ET_SDM300L-3_2.1.13
<?=Menu Q=Quit> Telnet-->_
```

3.6 MAINTENANCE INTERFACE

The default network configuration settings are:

- ▶ IP: **10.6.30.1**
- ▶ Admin Name: **admin**
- ▶ Admin Password: **1234**

The CiM-25 has been designed to support a means of allowing a customer to reset the unit back to the factory default settings, change the IP Address, and verify the software version. Use the following procedure to prepare for making these changes.

Perform the following steps:

- 1 Disconnect the CiM-25 from both the interfacing equipment and the Ethernet Network.
- 2 Connect the CiM-25 to the serial port of a PC using a cable defined below (null cable):

CiM-25 pin 2 to PC pin 3
CiM-25 pin 3 to PC pin 2
CiM-25 pin 5 to PC pin 5

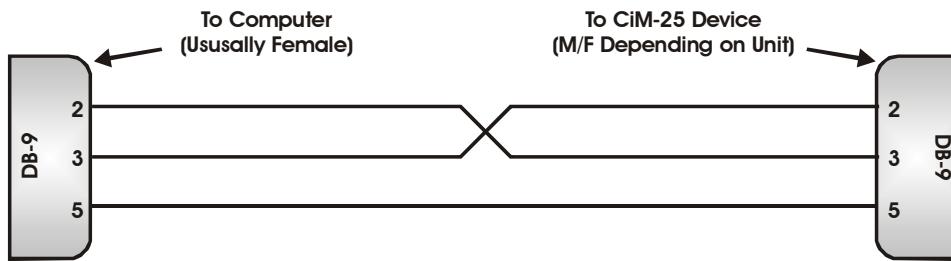

Figure 1. Null Cable Diagram

- 3 Power the CiM-25 using the Power Jack connector and a external 5 Vdc power supply.
- 4 Using a Serial Communication application such as Terminal, ProComm, etc., configure the PC's serial port to:

Baud: **19200**
Data rate: **8-N-1**

Use the procedures in following sections to:

- ▶ Reset to factory network defaults.
- ▶ Change network IP Address
- ▶ Verify software version.
- ▶ Change MAC Address
- ▶ Change Serial Number

3.6.1 RESETTING TO FACTORY DEFAULTS

Perform the following:

- 1 Enter the following command:

Command: <0/RST='cr'

Response: >0/RST=

3.6.2 CHANGING NETWORK IP ADDRESS

Perform the following:

- 1 Enter the following command:

Command: <0/IPA=xxx.xxx.xxx.xxx/yy'cr'

Where x is the IP Address and y is the subnet mask.

Response: >0/IPA=

Example: <0/IPA=192.168.001.002/16'cr'

16 would be a subnet mask of 255.255.0.0

- 2 To query the IP address enter: <0/IPA?'cr'

3.6.3 VERIFYING SOFTWARE VERSION

Perform the following:

- 1 Enter the following command:

Command: <0/SWR?'cr'

Response: >0/SWR= 1.0.1'cr'

3.6.4 CHANGING MAC ADDRESS

Perform the following:

- 1 Enter the following command:

Command: <0/MAC=xxxxxxxx'cr'

Where x is the MAC Address as shown on the label of the CiM-25.

Response: >0/MAC=

Example: >0/MAC=006B0000000A'cr'

- 2 To query the MAC Address enter: >0/MAC?'cr'

1. The MAC Address is unique to this unit. Change only under the factory direction or if it does not match the label.
2. Changing the MAC Address to anything other than the factory default, may result in erratic operation.

3.6.5 CHANGING SERIAL NUMBER

Perform the following:

- 1 Enter the following command:

Command: <0/SNM=xxxxxxxx'cr'

Where x is the Serial Number as shown on the label of the CiM-25.

Response: >0/SNM=

Example: >0/SNM=022080125A'cr'

- 2 To query the Serial Number enter: >0/SNM?'cr'

The Serial Number is unique to this unit. Change only under the factory direction or if it does not match the label.

NOTES

Appendix A. CiM-25/300L2/3 SNMP Interface

A.1 SNMP INTERFACE

The *Simple Network Management Protocol* (SNMP) is an application-layer protocol designed to facilitate the exchange of management information between network devices. The CiM-25/300L2/3 SNMP agent supports SNMPv2c.

A.2 MIB-II

The CiM-25/300L2/3 agent implements RFC 1213, Management Information Base for Network Management of TCP/IP-based Internets. This is known as “MIB-II support”. Please refer to RFC 1213 for this definition.

A.3 PRIVATE MIB IMPLEMENTATIONS

The agent also implements two private MIBs for the CiM-25/300L2/3. The CiM IP Controller MIB (cim-25) holds all the security, feature selection, and IP related parameters and the SDM-300L2/L3 modem MIB which contains all the modem specific parameters.

A.5.22 CIM25IPGATEWAY

| | |
|-------------------------|--|
| Name | cim25IpGateway |
| OID | 1.3.6.1.4.1.6247.3.1.13 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).cim25IpGateway(13) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | cim25IpAddress |
| Next sibling | cim25IpMask |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_IPADDR |
| Base syntax | IpAddress |
| Composed syntax | IpAddress |
| Status | current |
| Max-access | read-write |
| Description | CiM 25 IP Gateway |

A.5.23 CIM25IPMASK

| | |
|-------------------------|---|
| Name | cim25IpMask |
| OID | 1.3.6.1.4.1.6247.3.1.14 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).cim25IpMask(14) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | cim25IpGateway |
| Next sibling | readonlyPassword |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_IPADDR |
| Base syntax | IpAddress |
| Composed syntax | IpAddress |
| Status | current |
| Max-access | read-write |
| Description | CiM25 IP Mask. |

A.5.24 READONLYPASSWORD

| | |
|-------------------------|--|
| Name | readonlyPassword |
| OID | 1.3.6.1.4.1.6247.3.1.15 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).readonlyPassword(15) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | cim25IpMask |
| Next sibling | readwritePassword |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 4..10 |
| Description | Read-Only Password. |

A.5.25 READWRITEPASSWORD

| | |
|-------------------------|---|
| Name | readwritePassword |
| OID | 1.3.6.1.4.1.6247.3.1.16 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).readwritePassword(16) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | readonlyPassword |
| Next sibling | administratorPassword |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 4..10 |
| Description | Read-Write Password. |

A.5.26 ADMINISTRATORPASSWORD

| | |
|-------------------------|---|
| Name | administratorPassword |
| OID | 1.3.6.1.4.1.6247.3.1.17 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).administratorPassword(17) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | readwritePassword |
| Next sibling | trapIpAddress |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 4..10 |
| Description | Administrator Password. |

A.5.27 TRAPIPADRESS

| | |
|-------------------------|---|
| Name | trapIpAddress |
| OID | 1.3.6.1.4.1.6247.3.1.18 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).trapIpAddress(18) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | administratorPassword |
| Next sibling | trapCommunity |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_IPADDR |
| Base syntax | IpAddress |
| Composed syntax | IpAddress |
| Status | current |
| Max-access | read-write |
| Description | Trap IP Address. |

A.5.28 TRAPCOMMUNITY

| | |
|-------------------------|---|
| Name | trapCommunity |
| OID | 1.3.6.1.4.1.6247.3.1.19 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).trapCommunity(19) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | trapIpAddress |
| Next sibling | administratorName |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 0..20 |
| Description | Trap Community. |

A.5.29 ADMINISTRATORNAME

| | |
|-------------------------|---|
| Name | administratorName |
| OID | 1.3.6.1.4.1.6247.3.1.20 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).administratorName(20) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | trapCommunity |
| Next sibling | readonlyName |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 5..10 |
| Description | Administrator User Name. |

A.5.30 READONLYNAME

| | |
|-------------------------|--|
| Name | readonlyName |
| OID | 1.3.6.1.4.1.6247.3.1.21 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).readonlyName(21) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | administratorName |
| Next sibling | readwriteName |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 5..10 |
| Description | Read-Only User Name. |

A.5.31 READWRITENAME

| | |
|-------------------------|---|
| Name | readwriteName |
| OID | 1.3.6.1.4.1.6247.3.1.22 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).readwriteName(22) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | readonlyName |
| Next sibling | macAddress |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 5..10 |
| Description | Read-Write User Name. |

A.5.32 MACADDRESS

| | |
|-------------------------|--|
| Name | macAddress |
| OID | 1.3.6.1.4.1.6247.3.1.23 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).macAddress(23) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | readwriteName |
| Next sibling | submitconfig |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-only |
| Size list | |
| 1 | 12 |
| Description | MAC Address. |

A.5.33 SUBMITCONFIG

| | |
|-------------------------|--|
| Name | submitconfig |
| OID | 1.3.6.1.4.1.6247.3.1.24 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).cim25(3).cim25Objects(1).submitconfig(24) |
| Module | CIM25 |
| Parent | cim25Objects |
| Prev sibling | macAddress |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | submit(1) |
| Description | Submit changes in CiM 25 Configuration |

| Description | RX Reed-Solomon Interleave Value. (RRSI_) |

A.7.57 RXBPSKBITORDER

| | |
|-------------------------|---|
| Name | rxBPSKBitOrder |
| OID | 1.3.6.1.4.1.6247.12.1.3.13 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).rxParameters(3).rxBPSKBitOrder(13) |
| Module | SDM300L2_L3 |
| Parent | rxParameters |
| Prev sibling | rxRSInterleave |
| Next sibling | rxIESS310 |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | nrm(0) |
| 2 | inv(1) |
| Description | RX BPSK Data Ordering. (RDA_) |

A.7.58 rxIESS310

| | |
|-------------------------|--|
| Name | rxIESS310 |
| OID | 1.3.6.1.4.1.6247.12.1.3.14 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).rxParameters(3).rxIESS310(14) |
| Module | SDM300L2_L3 |
| Parent | rxParameters |
| Prev sibling | rxBPSKBitOrder |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | off(0) |
| 2 | on(1) |
| Description | RX 8PSK 2/3 IESS-310 Operation. (R310_) |

A.7.59 INTERFACEPARAMETERS

| | |
|---------------------|---|
| Name | interfaceParameters |
| OID | 1.3.6.1.4.1.6247.12.1.4 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4) |
| Module | SDM300L2_L3 |
| Parent | sdm300L2_L3Objects |
| Prev sibling | rxParameters |
| Next sibling | utilityParameters |
| Child | modemReference |
| Type | OBJECT-IDENTIFIER |

A.7.60 MODEMREFERENCE

| | |
|-------------------------|---|
| Name | modemReference |
| OID | 1.3.6.1.4.1.6247.12.1.4.1 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).modemReference(1) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Next sibling | txOverheadType |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | int(0) |
| 2 | ext1(1) |
| 3 | ext5(2) |
| 4 | ext10(3) |
| 5 | ext20(4) |
| 6 | out10(5) |
| Description | Modem Reference Clock. (MRC_) |

A.7.61 TXOVERHEADTYPE

| | |
|-------------------------|---|
| Name | txOverheadType |
| OID | 1.3.6.1.4.1.6247.12.1.4.2 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txOverheadType(2) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | modemReference |
| Next sibling | rxOverheadType |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | none(0) |
| 2 | idr(1) |
| 3 | ibs(2) |
| 4 | di(3) |
| 5 | async(4) |
| 6 | aupc(5) |
| Description | TX Overhead Type. (ITOT_) |

A.7.62 RXOVERHEADTYPE

| | |
|-------------------------|---|
| Name | rxOverheadType |
| OID | 1.3.6.1.4.1.6247.12.1.4.3 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxOverheadType(3) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txOverheadType |
| Next sibling | txDataFault |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | none(0) |
| 2 | idr(1) |
| 3 | ibs(2) |
| 4 | di(3) |
| 5 | async(4) |
| 6 | aupc(5) |
| Description | RX Overhead Type. (IROT_) |

A.7.63 TXDATAFAULT

| | |
|-------------------------|--|
| Name | txDataFault |
| OID | 1.3.6.1.4.1.6247.12.1.4.4 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txDataFault(4) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxOverheadType |
| Next sibling | rxDataFault |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | none(0) |
| 2 | data(1) |
| 3 | ais(2) |
| Description | TX Data Fault. (TDF_) |

A.7.64 RXDATAFAULT

| | |
|-------------------------|--|
| Name | rxDataFault |
| OID | 1.3.6.1.4.1.6247.12.1.4.5 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxDataFault(5) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txDataFault |
| Next sibling | txDataPhase |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | none(0) |
| 2 | data(1) |
| 3 | ais(2) |
| Description | RX Data Fault. (RDF_) |

A.7.65 TXDATAPHASE

| | |
|-------------------------|--|
| Name | txDataPhase |
| OID | 1.3.6.1.4.1.6247.12.1.4.6 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txDataPhase(6) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxDataFault |
| Next sibling | rxDataPhase |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | nrm(0) |
| 2 | inv(1) |
| Description | TX Data Phase. (TDP_) |

A.7.66 RXDATAPHASE

| | |
|-------------------------|--|
| Name | rxDataPhase |
| OID | 1.3.6.1.4.1.6247.12.1.4.7 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxDataPhase(7) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txDataPhase |
| Next sibling | txDriverType |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | nrm(0) |
| 2 | inv(1) |
| Description | RX Data Phase. (RDP_) |

A.7.67 TXDRIVERTYPE

| | |
|-------------------------|---|
| Name | txDriverType |
| OID | 1.3.6.1.4.1.6247.12.1.4.8 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txDriverType(8) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxDataPhase |
| Next sibling | rxDriverType |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | g703(0) |
| 2 | v35(1) |
| 3 | rs422(2) |
| 4 | rs232(3) |
| Description | TX Driver Type. (TXDR_) |

A.7.68 RXDRIVERTYPE

| | |
|-------------------------|---|
| Name | rxDriverType |
| OID | 1.3.6.1.4.1.6247.12.1.4.9 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxDriverType(9) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txDriverType |
| Next sibling | txClockSource |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | g703(0) |
| 2 | v35(1) |
| 3 | rs422(2) |
| 4 | rs232(3) |
| Description | RX Driver Type. (RXDR_) |

A.7.69 TXCLOCKSOURCE

| | |
|-------------------------|---|
| Name | txClockSource |
| OID | 1.3.6.1.4.1.6247.12.1.4.10 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txClockSource(10) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxDriverType |
| Next sibling | rxBufferClockSource |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | int(0) |
| 2 | ext(1) |
| 3 | ref(2) |
| Description | TX Clock Source. (TC_) |

A.7.70 RXBUFFERCLOCKSOURCE

| | |
|-------------------------|---|
| Name | rxBufferClockSource |
| OID | 1.3.6.1.4.1.6247.12.1.4.11 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxBufferClockSource(11) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txClockSource |
| Next sibling | extClkRefFrequency |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | int(0) |
| 2 | ext(1) |
| 3 | sat(2) |
| 4 | ref(3) |
| 5 | ins(4) |
| Description | RX Buffer Clock Source. (BC_) |

A.7.71 EXTCLKREFFREQUENCY

| | |
|-------------------------|--|
| Name | extClkRefFrequency |
| OID | 1.3.6.1.4.1.6247.12.1.4.12 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).extClkRefFrequency(12) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxBufferClockSource |
| Next sibling | txClockPhase |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 80..100000 |
| Description | External Clock Reference Frequency. Value Multiplied by 10. (ERF_) |

A.7.72 TXCLOCKPHASE

| | |
|-------------------------|--|
| Name | txClockPhase |
| OID | 1.3.6.1.4.1.6247.12.1.4.13 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txClockPhase(13) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | extClkRefFrequency |
| Next sibling | rxClockPhase |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | nrm(0) |
| 2 | inv(1) |
| 3 | auto(2) |
| Description | TX Clock Phase. (TCP_) |

A.7.73 RXCLOCKPHASE

| | |
|-------------------------|--|
| Name | rxClockPhase |
| OID | 1.3.6.1.4.1.6247.12.1.4.14 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxClockPhase(14) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txClockPhase |
| Next sibling | rxBufferSizeProgramming |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | nrm(0) |
| 2 | inv(1) |
| Description | RX Clock Phase. (RCP_) |

A.7.74 RXBUFFERSIZEPROGRAMMING

| | |
|-------------------------|---|
| Name | rxBufferSizeProgramming |
| OID | 1.3.6.1.4.1.6247.12.1.4.15 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxBufferSizeProgramming(15) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxClockPhase |
| Next sibling | rxBufferSize |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | bits(0) |
| 2 | ms(1) |
| Description | Interface Buffer Programming. (IBP_) |

A.7.75 RXBUFFERSIZE

| | |
|-------------------------|--|
| Name | rxBufferSize |
| OID | 1.3.6.1.4.1.6247.12.1.4.16 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxBufferSize(16) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxBufferSizeProgramming |
| Next sibling | rxFramingStructureT1 |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_OCTETS |
| Base syntax | OCTET STRING |
| Composed syntax | OCTET STRING |
| Status | current |
| Max-access | read-write |
| Size list | |
| 1 | 1..6 |
| Units | bits or ms |
| Description | Interface Buffer Size. (IBS_) |

A.7.76 RXFRAMINGSTRUCTURET1

| | |
|-------------------------|--|
| Name | rxFramingStructureT1 |
| OID | 1.3.6.1.4.1.6247.12.1.4.17 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxFramingStructureT1(17) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxBufferSize |
| Next sibling | rxFramingStructureE1 |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | none(0) |
| 2 | g704(1) |
| Description | RX T1 Framing Structure. (IRFS_T1_) |

A.7.77 RXFRAMINGSTRUCTUREE1

| | |
|-------------------------|--|
| Name | rxFramingStructureE1 |
| OID | 1.3.6.1.4.1.6247.12.1.4.18 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxFramingStructureE1(18) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxFramingStructureT1 |
| Next sibling | txCodingFormat |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | none(0) |
| 2 | g704(1) |
| Description | RX E1 Framing Structure. (IRFS_E1_) |

A.7.78 TXCODINGFORMAT

| | |
|-------------------------|--|
| Name | txCodingFormat |
| OID | 1.3.6.1.4.1.6247.12.1.4.19 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).txCodingFormat(19) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxFramingStructureE1 |
| Next sibling | rxCodingFormat |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | ami(0) |
| 2 | hdb3(1) |
| 3 | b8zs(2) |
| Description | TX Coding Format. (ICFT_) |

A.7.79 RXCODINGFORMAT

| | |
|-------------------------|--|
| Name | rxCodingFormat |
| OID | 1.3.6.1.4.1.6247.12.1.4.20 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).rxCodingFormat(20) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | txCodingFormat |
| Next sibling | dropDataFormat |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | ami(0) |
| 2 | hdb3(1) |
| 3 | b8zs(2) |
| Description | RX Coding Format. (ICFR_) |

A.7.80 DROPDATAFORMAT

| | |
|-------------------------|--|
| Name | dropDataFormat |
| OID | 1.3.6.1.4.1.6247.12.1.4.21 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).dropDataFormat(21) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | rxCodingFormat |
| Next sibling | insertDataFormat |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | t1(0) |
| 2 | t1esf(1) |
| 3 | t1ibs(2) |
| 4 | e1ccs(3) |
| 5 | e1cas(4) |
| 6 | e1ibs(5) |
| 7 | e131ts(6) |
| 8 | t1s(7) |
| 9 | t1esfs(8) |
| Description | Drop Data Format. (DDF_) |

A.7.81 INSERTDATAFORMAT

| | |
|-------------------------|--|
| Name | insertDataFormat |
| OID | 1.3.6.1.4.1.6247.12.1.4.22 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).insertDataFormat(22) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | dropDataFormat |
| Next sibling | insertE1CRCEnable |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | t1(0) |
| 2 | t1esf(1) |
| 3 | t1ibs(2) |
| 4 | e1ccs(3) |
| 5 | e1cas(4) |
| 6 | e1ibs(5) |
| 7 | e131ts(6) |
| 8 | t1s(7) |
| 9 | t1esfs(8) |
| Description | Insert Data Format. (IDF_) |

A.7.82 INSERTE1CRCENABLE

| | |
|-------------------------|---|
| Name | insertE1CRCEnable |
| OID | 1.3.6.1.4.1.6247.12.1.4.23 |
| Full path | iso(1).org(3).dod(6).internet(1).private(4).enterprises(1).comtech(6247).sdm300L2_L3(12).sdm300L2_L3Objects(1).interfaceParameters(4).insertE1CRCEnable(23) |
| Module | SDM300L2_L3 |
| Parent | interfaceParameters |
| Prev sibling | insertDataFormat |
| Next sibling | dropChAssignment |
| Type | OBJECT-TYPE |
| Numerical syntax | SNMP_SYNTAX_INT |
| Base syntax | INTEGER |
| Composed syntax | INTEGER |
| Status | current |
| Max-access | read-write |
| Value list | |
| 1 | off(0) |
| 2 | on(1) |
| Description | E1 Insert CRC Enable. (ICRC_) |

A.7.83 DROPCHASSIGNMENT

| | |
|-------------------------|--|
| Name | dropChAssignment |
