

HIGH POWER AMPLIFIERS 750 WATT

HPA 2717 SERIES FOR DBS-BAND

HPA 2717 A (indoor)

HPA 2717 B (outdoor)

ND SatCom has been a supplier to the Satcom industry for over 25 years. All necessary features required in today's satellite communication applications such as serial/parallel M&C interfaces, local and remote panels are available in this HPA product line. All RF parameters can be monitored and controlled on the front panel. The modular construction ensures easy servicing. The high voltage section is potted and all other electrical components are coated to protect against humidity and dust.

The outdoor versions of this series are available with two choices of remote panel. The standard panel allows the user to control the operating status of the amplifiers (standby, run, RF-on). An optional microprocessor-controlled remote panel displays additional status information and gives extended control options.
